HEMANTH S

Mysuru, India | +91-6363244248 | Email | LinkdIn | GitHub | Portfolio

PROFILE

MCA graduate with practical experience in Python, data handling, SQL, and data-oriented project development. Familiar with Pandas, NumPy, Excel, and Power BI, with experience working on data ingestion, logging, and performance evaluation during an AI R&D internship. Interested in using data analysis and visualization to identify patterns, evaluate performance, and generate meaningful insights. Seeking an entry-level Data Analyst opportunity to apply analytical and technical skills to real-world business problems.

CORE COMPETENCIES

Programming & Analysis: Python, SQL, Pandas ,Numpy
Data Visualization & Tools: Microsoft Excel, Power BI, Jupyter Notebook
Databases: MySQL, SQLite
Data Operations: Data Cleaning, Data Validation, Data Analysis, Reporting, KPI Evaluation
Other Tools: Git, GitHub, REST APIs.

AI & Machine Learning: Multi-Agent Systems, ML Fundamentals, Evaluation Metrics
Core Concepts: DBMS, Computer Networks, DSA(Basics)

PROFESSIONAL EXPERIENCE

Data Architect Intern | Chiac ASI (Panchasutra Ltd) **March 2026 – July 2026**

- Implemented state-management and logging components to track agent interactions and workflow execution.
- Monitored system performance using evaluation metrics such as detection accuracy, detection time, and false-positive rate.
- Used Python and SQL to support workflow monitoring, testing, debugging, and data-related tasks.

PROJECTS

Scout IQ – Football Data Analytics Pipeline
Python, SQL, REST API, JSON

- Developed a Python API client to retrieve football league, team, fixture, and player-statistics data.
- Built a data ingestion script to store raw API responses as JSON for downstream analysis.

Multi-Agent Disaster Management Simulator
Python, Fast API, SQLite, React

- Implemented state management, event logging, and evaluation components to monitor simulated disaster-response workflows.
- Evaluated agent performance using detection accuracy, detection time, and false-positive rate.

Skin Disease Detection Using AI & Machine Learning
Python, TensorFlow, Mobile Net, Flask

- Developed a web-based skin-lesion screening prototype integrating a machine learning model with a Flask application.
- Implemented user authentication, an administrative dashboard, and backend data storage.

EDUCATION

Master of Computer Applications (MCA)
Maharaja Institute of Technology, Mysuru | 2024 – 2026
CGPA: 9.47 / 10

Bachelor of Computer Applications (BCA)
Vidhya Vikas First Grade College, Mysuru | 2021 – 2024
CGPA: 7.5 / 10

CERTIFICATIONS

- **Agentic AI and AI Agents for Leaders** — Vanderbilt University, Coursera | September 2026
- **Blockchain and its Applications** — NPTEL, IIT Kharagpur | January–April 2025
