PROFILE

MCA student with practical experience in Python, backend development, data analysis, and AI/ML applications. Currently working as a Data Architect Intern at Chiac ASI (Panchasutra Ltd), where I'm involved in the Advanced Artificial Superintelligence Systems R&D Program. I've worked with data modeling, machine learning workflows, Flask, Fast API, Pandas, and NumPy, and I'm currently strengthening my skills in Data Analytics. I'm interested in building practical solutions with data and AI and looking for opportunities in Data Analytics.

SKILLS

Programming Languages: Python, SQL, PHP, HTML, CSS
Data Analytics: Analysis, Cleaning, Validation, Interpretation, Reporting
Database Technologies: MySQL, SQLite
Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Excel
AI & Machine Learning: Multi-Agent Systems, ML Fundamentals, Evaluation Metrics
Frameworks & Libraries: Flask, Fast API, Pandas, NumPy
Core Concepts: DBMS, Computer Networks, DSA(Basics)

EXPERIENCE

AI Research & Development Intern | Chiac ASI (Panchasutra Ltd) Mar 2026 – June 2026
Advanced Artificial Superintelligence Systems R&D Program

- Contributed to the development and evaluation of multi-agent AI systems.
- Worked on state management and logging mechanisms to track agent interactions and workflow execution.
- Monitored agent performance and analyzed evaluation metrics to assess system effectiveness.
- Used Python and SQL for data analysis, reporting, and workflow monitoring.
- Assisted in debugging and testing agent workflows; collaborated on AI research involving agent orchestration.
- Collaborated with team members on AI research projects involving agent orchestration and intelligent systems.

PROJECTS

Skin Disease Detection Using AI & Machine Learning
Tech Stack: Python, Flask, HTML, CSS, JavaScript, Pandas, NumPy

- Developed a web-based AI dermatology screening system with ML-based skin lesion risk prediction using Flask and Python.
- Built secure user authentication, admin dashboard, email notifications, and clean backend data storage.

Multi-Agent Disaster Management Simulator
Tech Stack: Python, FastAPI, React.js, SQLite, HTML, CSS, JavaScript

- Built multi-agent disaster response simulation with agents for incident detection, resource allocation, and rescue coordination.
- Implemented REST APIs, React dashboard, SQLite storage, and Smart vs Baseline strategy comparison for evaluation.

Online Quiz System with Login (PHP & MySQL)
Tech Stack: PHP, MySQL, HTML, CSS

- Developed a login-based online quiz app with quiz creation, question management, answer submission, and result calculation.
- Stored user data, questions, and scores securely using MySQL; displayed correct answers and scores post-submission.

EDUCATION

Master of Computer Applications (MCA)
Maharaja Institute of Technology, Mysuru | 2024 – 2026
CGPA: 8.26 / 10

Bachelor of Computer Applications (BCA)
Vidhya Vikas First Grade College, Mysuru | 2021 – 2024
CGPA: 7.5 / 10
